

Stock Rover 101 — Webinar Outline

A Few Basics

- Left Side Panel
 - fully collapsible, or collapse individual menus
- Help Menu
 - upper right hand corner, along with search and your account information
 - Help, What's new, Contact Us

1. Start Menu - for starting almost any task

- Manage Alerts, Analyze Portfolio, Connect to Brokerage, Open Notes, & more
- customize with different actions, some of which will bring up dialogue boxes to guide you
- search box allows you to search for any action in the start menu
- Investors' Library lives here as one of the start menu options
- connect to your brokerage account from here, or the right click menu on portfolios in the navigation panel

2. Market Summary

- lists latest updates in "as of"
- links to Markets homepage if you click on hyperlinked "market summary"

3. Quotes Box

- add list of tickers, portfolios, watchlists, indices, sectors, or industries
- see price and daily change (% or \$)
- can include or not include tickers in Table with checked box (uncheck individuals, or click "include all" to see or not see them in the table)
- Ticker Tool Tip

4. Navigation Panel

- Populates Table rows
- Portfolios, watchlists, quotes, and screeners are user-defined under "My Stuff"
- Create or import your own
- Re-order the list by dragging-and-dropping
- Indices, Sectors, Commodities and ETFs for browsing under "Markets"
- Right-click any item in Navigation panel for menu of options

The Table (center top panel)

- "Portfolios" at top of table shows which portfolio you are currently viewing, and easy to jump between portfolios by clicking it
- Columns (metrics) are organized into Views
 - jump to any view with the "views" drop down menu
- Views are customizable

- o Add, remove, or sort by a column
 - o Right-click on a column header or View tab and select 'Modify'
- Right-click any row, column header, or View tab for a menu of options
- See ticker history
 - o 10 years/quarters data for Premium; 5 years/quarters for Basic
- Ticker info tooltips
- Filter, save, and print are all located in "actions: in table header"
 - o Filtering
 - separate window
 - o Filters stay on Table until removed by you
- Save Table
 - o Save stocks in the Table as a watchlist or portfolio
 - o Export to CSV (Premium)
- Print
 - o Copy and paste printable format into spreadsheet programs
- Add column
 - o search for column in box, tells you which views contain each of the returned metrics, jump straight to that view from the drop-down menu
- Target Buy Price and Target Sell Price

Screening

- Run a screener instantly by clicking on it in the Navigation panel
 - o screener brings up number of passing stocks in Table
- Modify or create new screener by right-clicking
 - o manipulate by changing the metrics of the stock (you can how many are passing with change)
 - o checking boxes only shows you how many would be passing with or without that metric, doesn't apply to table
 - o to have it apply to table, need to remove the screener by clicking the "x"
- Save interesting population of stocks as watchlist

The Chart (center bottom panel)

- Links with Table
 - o link / unlink controls are now in the settings menu
 - o left side of chart's toolbar controls the lines that are charted, the right side controls any additional charting settings
 - o type into box on left to add to the chart, or use the drop down arrow to find a history of recently charted tickers

- Change time periods
- Zoom in on a chart
- Primary ticker
 - Replaced by what is selected in Table (if linked)
 - Swap tickers to be primary tickers
 - Chart vs. Compare in chart
 - Dependent benchmarks
 - Technicals apply only to primary ticker
 - Fundamental metric packages apply only to primary ticker
 - add or remove comparison tickers by clicking the compare menu item, can choose to set these stocks as baseline
- Set a baseline
 - click on the ticker in the chart to do this
- Adjust price for dividends
- Add technicals, fundamentals, or change chart settings
 - bollinger bands
 - PE as fundamental, charts below ticker
- Shortcuts (**Premium**)
 - Save your favorite chart configurations to apply them easily

The Insight Panel (right side of screen)

- Populated by the row that is selected in Table
- Summary tab
 - Market summary
 - Home Page (company summary)
 - Ownership and officers (SEC filings, major holders, and insider transactions)
 - Filings (reports, other forms)
 - Key performance details
 - Portfolio allocation - if portfolio is loaded in the table, shows the allocation for stock that is selected in table
 - Links to outside research sites
- Detail tab
 - Detailed financial data
 - Switch between quarterly and yearly data (Q/Y button)
- Statements tab
 - Earnings statements for whatever stock is loaded in the table, switch between quarterly and yearly
- Analysts tab

- Find data on analyst ratings and estimates from analysts following whatever stock is selected in the table
- Use radio buttons at top to select between ratings and estimates
- News tab
 - Stock-specific or market news
 - Click on a story to view it
 - Add news feeds from list
- Peers tab
 - Functions similarly to main table; always shows industry peers of selected stock
 - Option to load the stocks to the table
 - Filtering through column header has option to filter a metric within a percentage of the selected stock

Markets:

- Markets - access to earnings calendar, Forums, markets homepage and additional news
 - great for daily visits to stay updated on stocks of interest.
 - Access through “Market Summary” hyperlink in Stock Rover, or click on “Markets” in homepage.

Stock Rover Mobile

- Tablet and phone apps – free and intuitive to use
- Just go to Stock Rover in the browser of your phone or tablet
- iPad and iPhone users can download the native app through the Apple Store
