BUSINESS SUMMARY

3M is a multinational conglomerate that has operated since 1902, when it was known as Minnesota Mining and Manufacturing. The company is well known for its research and development laboratory and it leverages its science and technology across multiple product categories. As of 2020, 3M is organized into four business segments: safety and industrial, transportation and electronics, healthcare, and consumer. Nearly 50% of the company's revenue comes from outside the Americas, with the safety and industrial segment constituting a plurality of net sales. Many of the company's 60,000-plus products touch and concern a variety of consumers and end markets.

WARNINGS

Name Severity Details

Negative Sales Growth Years Medium Number of Years: 6; Sales 1Y Chg (%): -4.5%

In the last decade this company has had several years with negative revenue growth. If the top-line sales are shrinking this company could be a value trap that looks inexpensive on some measures but never outperforms the market.

Goodwill on a company's balance often results from over-paying to acquire other firms. A high percentage here can turn into impairment charges that weigh down future earnings for the company.

GAAP Earnings vs. Pro Forma Low Months Official EPS: \$1.70; Announced EPS: \$2.42

The GAAP compliant earnings that the company filed with the SEC are less than the pro-forma earnings they announced to the press. Pro-forma earnings can exclude special one-time charges but some distressed companies post these "one-time" charges quarter after quarter.

Negative Earnings Low EPS: -\$12.63; Earnings Yield: -13.4%

This company has negative cumulative earnings over the past 12 months. Make sure to understand the company's prospects for becoming profitable.

REPORT TIPS

Metric Definitions

Metric descriptions are available at stockrover.com/help/metrics/metric-overview

Quantitative Scores

Our scores analytics is to offer our concise analysis of a stock in powerful, but easy to digest format. Each of the composite score metrics are designed to use the best available accounting practices as well as source data from SEC filings. The scores are computed for a company vs. the market as a whole.

Fair Value

Fair value performs a forecasted discounted cash flow analysis of a company to determine the company's intrinsic value based on the expected future cash flows the company will produce. It basically determines what a company is worth based on how much cash flow it is expected to generate for you in the future, taking into account the time value of money and the predictability of those forecasted cash flows.

<u>Peers</u>

Peer ratings are computed from ranking companies in the same
